SHOULD READ VOLUME 58.

SUBJECT INDEX, VOLUME 57

Aalen–Johansen estimator 352, 792
Aalen's linear hazard model 792
Accuracy 946
Adaptive designs 171
Adaptive randomization 560
Adaptive sampling 862
Administrative lists 185
Affymetrix 701
Age dependence 841
Age of onset 502
Age-specific mortality 157
Aggregate data analysis 898
Agreement 1012, 1020
AIDS 37, 58, 997
Animal abundance 531
Approximate posterior 89
Approximate unconditional inference 972
Approximation 684
Ardea cinerea 540
Ascertainment sampling 481
Asymptotic inference 972
Asymptotics 997
Attentuation 671
Autoregressive process 459
Autoregressive structure 137
Auxiliary variables 593

Bayes 13
Bayes decision theory 432
Bayesian analysis 612
Bayesian design 560
Bayesian disease mapping 898
Bayesian inference 280
Bayesian nonparametric estimation 237
Bayesian sequential design 823
Berkson error 13
Beta-binomial distribution 917
Bias 871
Biased sampling 413
Binary data 576, 718
Binding probability 981
Binomial distribution 481
Biodiversity 531
Biological variables 387
Biomarkers 21, 576, 657
Birds 540
Bone marrow transplant data 792
Bootstrap 64, 200, 263
Bootstrap method 764
Bootstrap procedure 369
Bowhead whale 832
Branching process 178
Breslow thickness 665

Cancer registry 684
Cancer screening 492
Capture–recapture estimation 832
Capture–recapture experiment 192
Carcinogenesis 71
Carcinogenicity experiment 79
Case–control family studies 502
Categorical data 888
Causal inference 21
cDNA 701
Cell survival 937
Censoring 684
Censoring by death 21
Census data 540
Cervical cancer 492
Change point 305
Change-point model 37
Character process models 157
Chiasma 369
Chi-bar squared distribution 650
Cholesky decompostion 287
Chromosomal breakage data 1028
Chronic disease 30
Classical error 13
Classical swine fever 178
Classification 145, 378
Classification and regression tree 305
Clinical trial 245, 432, 548, 569, 823
Cluster analysis 145
Cluster randomization 521
Clustered binary outcome data 332
Clustered data 510, 718
Clustered failure-time data 764
Cochran–Armitage test 398
Cochran test 200
Cohort case–control study 764
Cohort designs 735
Cohort study 718
Colorectal cancer screening 30
Combination chemotherapy 422
Competing risks 30, 89, 510
Concomitant ranking 964
Conditional independence 200
Conditional likelihood 192
Conditional logistic regression 332
Confidence bands 352, 773
Confidence interval 209, 263
Constrained optimization 422
Contingency table 888, 946
Continual reassessment method 237, 671
Controlled-release drug formulation 422
Copula models 502
Cormack–Jolly–Seber model 832
Correlated binary data 200
Correlated data 521, 576, 718
Correlated failure times 502
Correlated kappa 1012
Correlated random effects 145
Cost analysis 643
Cost constraint 163
Cost models 964
Counting process 192
Covariance matrix 225
Covariates 852
Cox models 287
Cross-validation 781
Cumulative model 492
Current status 813
Curve-free continual reassessment method 245
Cytomegalovirus 298

Decision analysis 30
Density ratio model 665
Dependence 981
Dependent censoring 37, 58, 89, 510
Design of experiments 701
Diagnosis 657
Dichotomization of predictors 878
Dirichlet process 593
Discrete-time survival 137
Discriminant analysis 145
Disease mapping 492
Disease markers 813
Disease remission 71
Diversity 531
DNA 241
DNA fingerprints 378
D-Optimality 735
Dose finding 245, 560
Dose–response 13, 403, 593
Double penalized log-likelihood function 601

Ecological bias 898
EM algorithm 129, 178, 298, 369, 448, 510, 612, 754
Empirical Bayes 531
Empirical likelihood 413
Environmental sampling 586
Equivalence 957
Errors in variables 448
Estimated likelihood function 352
Estimating equations 621, 643
Estimation of population size 185
Estimation of the population mean 964
Exact inference 481
Exact poly-3 test 403
Exact randomization test 403
Exact unconditional inference 972
Exchangeable random variables 481

Factor analysis 813
Factorial treatment designs 216
Familial aggregation 718
First-order approximation 888
Follow-up process 621
Fragile sites 1028
Frailty 324

Frailty model 98, 287, 754
Functional models 121

Gaussian approximation 163
GEE2 718
Gene expression 701
General linear model 216
Generalized estimating equations 521, 675
Generalized linear mixed models 80, 129, 569, 671
Generalized linear models 1
Generalized maximum-likelihood 439
Generalized score test 398
Genetic variation 157
Genotype 145
Geostatistics 280
GHK simulator 316
Gibbs sampler 64, 906
Gibbs sampling 98
Goodness of fit 1
Gradient projection 64
Graft-versus-host disease 792
Group sequential clinical trials 1005
Group sequential trials 43
Growth-curve analysis 448

Habitat modeling 270
Harbor porpoise 862
Hazard model 754
Herons 540
Heterogeneity 225
Heterogeneity in response to exposure 342
Heterogeneous capturability 192
Heteroscedastic 650
Hierarchical modeling 270
Hierarchical models 225
High-dimensional data 378
Historical controls 917
Historical data 89
Historical ecological research 888
HIV 298
HIV-1 145
HIV infection incidence 443
Homogeneity of variance 216
Homoscedastic 650
Horvitz–Thompson estimation 586
Horvitz–Thompson estimator 852
Hotelling's T^2 distribution 650

Identifiability 287
Image analysis 928
Image processing 701
Incomplete contingency table 185
Indifference interval 671
Induction therapy 48
Inference for stochastic processes 171
Infinite dimensional traits 157
Informative censoring 612, 742, 792
Informative drop-out 718
Informative missingness 631
Informative prior 280
Intent to treat 48
Interim analyses 89, 569
Internal pilot 548
Internal validation 448
Interobserver agreement 209
Interval censoring 79
Interval-censored data 439
Intervention studies 521
Intraclass correlation 209
Intubation 727
Inverse weighting 48

Joint likelihood 64

Kalman filter 121, 540
Kaplan–Meier estimator 684
Kernel estimation 773
Kernel estimator 263
Kolmogorov–Smirnov test 665
Kronecker product 521

Labeled-cell fraction 937
Langevin–Hastings update 280
Laplace approximation 287
Lapwings 540
Latency 813
Latent variable 13, 71, 110, 906
Length bias sampling 665
Leslie matrix models 540
Leukemia 560
Level probability 917
Levene's test 216
Life history data 324
Likelihood 13, 1034
Likelihood principle 1005
Likelihood ratio 657
Likelihood ratio statistics 413
Likelihood ratio test 665
Line transect sampling 862
Link function 1
Logistic 852
Logistic regression 171, 593
Log-linear model 185, 981
Log-normal 463
Log-probability model 981
Longitudinal data 1, 37, 324, 612, 631, 727, 989
Longitudinal study 548
Lymphocyte infusion 560

Main study/validation study design 871
Maintenance therapy 48
Mantel–Haenszel test 200
Marginal likelihood 64
Marginal model 1, 342, 764
Markov chain 342
Markov chain Monte Carlo 225, 280, 823, 832, 841, 906
Markov chain Monte Carlo algorithm 79
Martingale 773
Matched-pair design 957
Maximin designs 735
Maximized score test 305
Maximum likelihood 178, 342, 531, 540, 621, 832, 928
Maximum likelihood estimation 369, 917
Maximum penalized likelihood 443
Maximum tolerated dose 245
Measurement error 13, 110, 352, 448, 871, 878
Measurement error model regression 448
Median regression 643
Medical imaging 946
Meiosis 369
Metropolis–Hastings algorithm 129
Microarrays 701, 981
Microbial communities 378

Two-stage design 548
Two-stage sampling 586
Two-stage trial 432
Unconstrained parameterization 225
Validation 803
Validation sample 413
Validation study 1034
Vanellus vanellus 540
Variability 701
Variable selection 378
Variance and confidence interval for prevalence 684
Variance components 576
Variance spending 432
Variogram 129
Versatile test 997
Vertex direction methods 448
Visual ranking 964
von Bertalanffy growth curve 459
von Bertalanffy model 448
Waterfowl habitat 270
Weibull intensity 324
Weighted least squares 216, 1012
Wildlife abundance estimation 862
Winter weather 540
Year dependence 841
Z-Score test 463
